

## ***INFORMED CONSENT: EXPOSURE TO 5G RADIATION***

---

*Please circle YES or NO*

Despite an almost total lack of research into possible adverse health effects of RF Millimetre Wave radiation, I am happy for the proposed roll-out of 5G to go ahead. **YES**   **NO**

I am aware that Radio Frequency (RF) radiation was classified as a Group 2B Possible Human Carcinogen by the International Agency for Research on Cancer/WHO in 2011. **YES**   **NO**

I am aware that children are more vulnerable than adults due to their thinner skulls and other physiological factors. **YES**   **NO**

I am aware that the 5G roll-out would require many thousands of new antennae to be installed close to homes and schools, each transmitting RF radiation at higher frequencies than existing 2G, 3G and 4G networks. **YES**   **NO**

I am aware that there are thousands of research studies published in reputable scientific journals showing that RF radiation can cause serious health effects including cancer, damage to human and animal sperm, loss of DNA repair capacity in human stem cells. **YES**   **NO**

I am aware that 190 scientists from 39 nations submitted an appeal to the United Nations, U.N. Member States and the World Health Organisation (WHO) requesting they adopt more protective exposure guidelines for this type of radiation in the face of increasing evidence of risk. **YES**   **NO**

I understand that the New Zealand Safety Standards for RF radiation relate only to short-term heating effects of the radiation, NOT to biological effects resulting from long-term exposure. **YES**   **NO**

I am confident in the N.Z. Ministry of Health's Safety Standards, even though some countries have limits hundreds or even thousands of times lower. **YES**   **NO**

**I give my consent for myself and my children to be exposed to continuous, pulsed 5G radiation for 24hrs a day, 7 days a week**

***YES***                      ***NO***
